Professional Summary

B.Tech Cybersecurity 4th-year student with hands-on experience in SOC operations, SIEM, security monitoring, Linux, networking, log analysis, and threat detection. Completed SOC Analyst Level 1 training with practical exposure to Splunk, IBM QRadar, Kali Linux, Ubuntu logs, Nmap, Snort, and cybersecurity labs. Seeking an entry-level SOC Analyst or Cybersecurity role.

Technical Skills

Security	SOC Operations, Security Monitoring, Incident Detection, Threat Intelligence, Threat Hunting, Event Correlation
SIEM	Splunk, IBM QRadar, SPL, AQL, Log Analysis
Networking	TCP/IP, HTTP, DNS, DHCP, ARP, Nmap
Operating Systems	Linux, Ubuntu, Kali Linux, Windows
Security Tools	Wireshark, Snort, Nmap, VirtualBox, Metasploitable
Programming	Python, SQL, NumPy, Pandas

Experience

SOC Analyst Trainee	<i>SOC Analyst Level 1 Training</i>
• Practiced SOC operations, security monitoring, log analysis, and alert investigation. • Used Splunk and IBM QRadar for security event monitoring and analysis. • Practiced Splunk SPL and QRadar AQL for searching and investigating security events. • Gained practical knowledge of threat intelligence, threat hunting, and event correlation.	

Technical Projects

Detecting Web Attacks with End-to-End Deep Learning	<i>Python — Flask — CNN — BiLSTM</i>
• Developed a system to classify HTTP traffic as Normal, SQL Injection, XSS, CSRF, or DDoS. • Applied tokenization, character-level encoding, and padding for HTTP data preprocessing. • Designed a CNN + BiLSTM architecture for automated web attack detection. • Integrated Flask WAF middleware for traffic interception, classification, and logging.	
Ubuntu Log Monitoring with Splunk	<i>Splunk — Ubuntu — SPL</i>
• Collected and monitored Ubuntu system and authentication logs using Splunk. • Created indexes and used SPL searches for security event investigation.	
Cybersecurity Vulnerability Assessment Lab	<i>Kali Linux — Nmap — VirtualBox</i>
• Practiced network discovery, IP addressing, ARP, service enumeration, and security testing. • Used Kali Linux, Nmap, VirtualBox, and Metasploitable in an isolated lab environment.	

Certification

SOC Analyst – Level 1

Training in SOC fundamentals, SIEM, security monitoring, log analysis, alerts, and threat detection.

Education

B.Tech in Cybersecurity	<i>2023 – 2027</i>
DRK College Of Engineering And Technology, India	

Technical Achievements

- Completed SOC Analyst Level 1 training with practical SIEM and security monitoring exposure.
- Developed a deep learning project for detecting and classifying common web attacks.
- Practiced cybersecurity labs involving Kali Linux, Ubuntu, Nmap, Snort, Wireshark, and Metasploitable.

Relevant Coursework

Cybersecurity Fundamentals, Security Operations, SIEM, Network Security, Threat Detection, Linux Security, Vulnerability Assessment, Machine Learning.
